

MAXA Workbenches

MAXA workstations are an ideal unit for small parts storage, assembling of components and many other heavy industrial applications. The cabinets are supplied standard with either a combination of the K855 5 drawer storage cabinet or the 2 door K85DD storage cupboard. Cabinets can also be supplied with a large range of parts bins and divider options available with the MAXA range.

MAXA Workbenches and Workstations are designed and manufactured for use in all industrial and maintenance workshops, warehouses and laboratories. You can easily build a complete Workstation by including power, lights, shelves & cabinets.

Standard Features

- Benchtop types available: Stainless Steel, galvanized steel and laminate
- Can be supplied with either 5 drawer cabinets or 2 door storage
- Mobile workbenches are supplied with 4x heavy duty swivel castor wheels with individual brakes
